Subject: Re: a few questions . . .

Ok, this is what I've put up now on the health care board in my resident hall and in the student health office. i'll be contacting you to re-order more solution soon.

It seems like the minute I get the sniffles I can be sure that a fever blister isn't far off. Living in a dorm with 54 other people on my floor, you can be sure that germs spread quickly, and everyone's always getting sick. After the ump-teenth time I suffered with fever blisters and cold sores this semester, I ordered The Joshua Solution and within days, the sore was gone. I put it on my lips the next time I got that itchy tell-tale blister sign, and the sore never developed. I would definitely recommend this solution to anyone who is sick and tired of looking at gross blisters any longer! I've tried everything on the market, but this stuff works!
