Dear Mary,

I have been suffering from cold sores ever since sunburning my lips on spring break 12 years ago. They are painful and embarrassing. About 8 years ago, I was searching the Internet, desperate, because I had another outbreak. I ordered the Doctors Solution and was amazed at the results. It not only stopped my current cold sore in it's tracks, it prevented future cold sores from appearing. When I feel the itching/tingling sensation, I apply the Solution and nothing ever happens. One time I ran out, and of course felt one coming on, and got a cold sore. Yikes! I will never be without the solution again. I have one in my bathroom, in my purse, and in my car. I ordered the Solution for my parents and brother who also suffer. I have tried almost every other remedy on the market, even medical prescriptions and nothing else has worked. Not only does Abreva NOT work, you are stuck with a white blob on your face. Doctors Solution not only works, but it's invisible. I can't tell you enough what it has done for me.

I then thought I'd try the acne medication since I also have re-occurring acne outbreaks. I have not had a single blemish since using the acne products. I can't believe your stuff is not in every store around the country. Both the cold sore and acne medicine are 'miracle cures' for me. Thank you and the Doctor SO MUCH!

Sincerely,  
Ann Matuska
