My name is Jenny, I'm 26 from Canada. I have genital herpes since 2002. I was very embarrassed by it. I thought that my world was ending. I cried and tried everything in my power to control it and I promise you I spent A LOT of money on things that don't work at all.

I had outbreaks every 3 weeks, it was really bad and hurt like hell. I discussed with my doctor and she prescribed me some famvir twice daily. It worked great but after one year of treatment, I had to stop it for two months just to see how it goes. Guess what, I had an outbreak.

My boyfriend had some Joshua solution at home for his canker sore and it worked very well for him. He has not even one canker sore per year now. I thought that I had nothing to lose but to try it. I tried the Joshua solution and it stopped burning right away. I said to myself that it was a miracle!!!

Nothing worked that well since my first outbreak. After 24 hours everything was dry and almost gone... The month after I had another outbreak but it was worse. I put some Joshua Solution on it again like 5 times that day.

The morning after, everything was dry and almost gone, it was amazing. I didn't have an outbreak since. I've been 3 months free from it!!!! Never happened before. THANK YOU SO MUCH!!!!

I hope this message can help some more very sad people about genital herpes.

Thank you again!!!  
Jenny from Canada
