In my High school years I was stricken with Mono. As a young adult I started getting cold sores often until I hit 30 years old. At that time I started to get them more frequently, during that time of the month or when I spent too much time in the Nevada sun. At that age I was also informed that I we Diabetic! My immune system was obviously weak! I tried every product on the market for the next 9 years with regards to getting rid of or preventing the cold sores, nothing worked until a friend told me about Joshua Solution. The first time I used it I already had a cold sore and it reduced the healing time to under a week instead of the usual 2 weeks plus! After that I began using it in a more preventative manner. Most of the time it stops me from getting a cold sore, however if I do get one as I said the time is drastically reduced. It is the only product I recommend to my friends.

Due to a poor immune system, I recently came down with shingles. While in the emergency the doctor tried to prescribe different ointments. I took the prescription and later through it away! I remembered the Doctors Cold Sore site has something about shingles. I knew right away if it worked on my cold sores, I was going to use it on the shingle blisters. It was remarkable! The affected areas never became blistered and during the Doctors check up she said that she had never seen the shingles heal so fast. What was my secret she asked! It also helped to reduce the pain with no itching. It left no scaring on my skin. The worst of it was a little staining on the nightly tee-shirt!

Cold sores are unsightly, being in a position that regularly deals with the public I am blessed to have discovered this remarkable secret!

Sincere regards,

Christine
